**PHARMAFEED**  
[www.pharma-feed.com](http://www.pharma-feed.com)

Fusion Concepts, Inc. presents PHARMA-FEED™ Friction Feeders — which let you run folded DFUs and inserts in any direction, without the usual headaches and hassles. In fact, these Feeders are designed to overcome the flaws inherent in most Feeder designs. We understand the needs of the Pharmaceutical industry for simple, flexible equipment that keeps your lines up and running and provides the consistency you need for quality control.

Fusion Concepts, Inc. was founded upon the notion that today's competitive markets demand flexible yet precise solutions that provide both reliable, efficient manufacturing and versatile, unique marketing/merchandising appeal.

Our solutions reflect more than 20 years of industry experience. They are tailored to a variety of markets and are thoughtfully applied to yield direct results for our customers' top and bottom lines.

Efficient paper-processing equipment and unique packaging supplies.

Fusion Concepts, Inc.

Suppliers of unique packaging equipment and supplies.

Accuracy + Flexibility + Speed – Problems = Fusion Concepts

#### Top customers demand effective solutions

3M Pharmaceuticals  
Abbott Laboratories  
Ethicon Endosurgery  
Johnson & Johnson  
Wyeth Ayerst Lederle  
Ortho-McNeil Pharmaceuticals  
Schering  
Warner Lambert  
Novo  
Merck Sharpe & Dohme  
Pharmacia & Upjohn  
Sicor  
Gensia  
LTS Lohman

#### Fusion Setup, Service & Support

Our team can help you get up and running—and stay running—for years to come.

# fusion concepts

## German-engineered for precise, efficient, scalable production

Fusion can help streamline your production line, saving time and money. No more stubborn one-way-only inserts. No more incessant jam-ups and line stops. You can control every aspect of the job—from start to finish—and deliver a professional product with the consistency industry standards demand.

Our machines are built to grow with you. They're easy and intuitive to use, so there's no need to hire specially trained personnel. Plus, we offer the set-up, training, support and service you need to get up and running—and keep you running smoothly, year after year. Machines and parts are standard, not custom, so downtime is never a problem.

Companies see big returns when they incorporate Fusion's PHARMA-FEED™ Feeders into their existing production lines. Fusion's Feeders complement established systems, which makes transitioning to Fusion smooth and simple.

## RFID Solutions

Worried about making sure your machine will adapt as your technical needs change in the future? Our innovative integrated READ&FEED™ RFID solutions offer the perfect alternative to cumbersome and expensive pressure-sensitive labeling solutions.

## Built to handle even the most finicky jobs—quickly and efficiently

Does your Feeder dictate how you process folded DFUs and inserts? Tired of expensive and inconsistent “glued” inserts? Wish your carefully engineered line wasn't hobbled by the least expensive component? Now there's an alternative. Fusion's PHARMA-FEED™ equipment is designed to eliminate the problems that plague your production lines—giving you a fast, fool-proof way to feed, scan, verify, and integrate pharmaceutical inserts with your wrappers and cartoners.

You'll save money by eliminating costly downtime and keep your line running smoothly at top speed. And you'll finally have the flexibility to run inserts in any orientation—even open edge leading—without glue or tabs. PHARMA-FEED™ feeders let you determine the best way to run a job.

## Other Feeders vs. Fusion's PHARMA-FEED™ Feeders

- Integrated READ & FEED™ single-step RFID solutions
- Feeds inserts and DFUs in any orientation
- No vacuum hassles
- Compact form factor—fits into small footprints
- Extended run time with autoloader
- Feeds singles and batches
- Easily integrates with wrappers and cartoners
- Gently feeds sensitive materials like blisters, adhesive bandages, and foils
- Reject at the feeder to avoid defective packages
- Standard optional scanning and verification solutions
